SUMMARY

AI Engineer and Software Developer specializing in end-to-end Artificial Intelligence systems, combining strong backend engineering with applied Machine Learning and Generative AI. Experienced in building production-grade LLM applications, multi-agent orchestration platforms, RAG pipelines, and computer vision systems, delivering measurable business impact. Proven ability to take AI solutions from data preparation and model development to deployment and visualization.

EDUCATION

Bachelor of Technology (B.Tech) – Computer Science Engineering (Artificial Intelligence)

Shri Shankaracharya Institute of Professional Management & Technology, Raipur, Chhattisgarh

2022–2026 — CGPA: 8.15

TECHNICAL SKILLS

Languages: Python (Advanced), JavaScript, SQL, HTML5/CSS3

Frameworks: LangChain, LangGraph, TensorFlow, Keras, Scikit-learn, OpenCV, FastAPI, Flask, React.js, React Native

AI/ML: Machine Learning, Deep Learning (CNNs), NLP, Generative AI, RAG, AI Agents, Transfer Learning, Sentiment Analysis, Text Classification, Hyperparameter Tuning

Tools: Docker, Git, CI/CD (GitHub Actions), MLOps, REST Architecture, Android Studio, Google Colab

Data: Pinecone/Chroma, MySQL, MongoDB, PostgreSQL, Power BI, Google BigQuery

WORK EXPERIENCE

Associate Software Developer | Grid Seven AI LLP (Remote)

October, 2025 – Present

Engineered an automated OKR analysis system using Time Series Forecasting and MongoDB, improving tracking efficiency by 20% via a React dashboard. Architected a modular cross-platform desktop application reducing feature integration effort by 15%, and built REST APIs to support analytics and AI inference workflows.

AI/ML Consultant | RTS Consulting Automation (Canada, Remote)

July, 2024 – January, 2025

Developed predictive maintenance and quality control solutions using Deep Learning, improving industrial planning efficiency by 15% through high-accuracy forecasting models.

PROJECTS

Multi-Disease Prediction System | *DL, Medical Imaging, Multimodal AI, Edge Deployment* | [GitHub](#)

Built a diagnostic platform for 50+ diseases achieving 93% accuracy, reducing diagnostic error by 30% using a hybrid CNN and ensemble pipeline. Deployed Dockerized FastAPI applications with inference latency under 200ms, cutting average time-to-diagnosis by 40%.

Industrial Defect Detection ([Springer Nature](#)) | *Applied CV Research* | [GitHub](#)

Co-authored a research paper on defect identification using CNNs. Data set curation, preprocessing, augmentation, and feature preparation was performed using Python, Pandas, and NumPy. Evaluated models using precision and recall, achieving competitive results across multiple defect categories.

Intellixa: Multi-Agent AI Orchestration Platform | *LLMs, LangGraph, RAG, Agent Systems* | [GitHub](#)

Implemented LangGraph-based multi-agent workflows, reducing LLM costs by 67% and hallucinations by 30% through a Critic-Reviewer pattern. Optimized tasks into 4–6 strategic LLM calls, minimizing agent conflicts and enabling reliable production-grade autonomous workflows.

Intelligent Document Assistant | *Generative AI, RAG, NLP* | [GitHub](#)

Built an RAG-based QA system for NHAH documents that enables natural-language queries over PDF/DOCX files. Implemented ingestion, segmentation, embeddings, and semantic search using FastAPI, LangChain, and vector databases, reducing manual lookup time by 80%.

PUBLICATION

Smart Factory Product Defect Detection Using Deep Learning | *Springer Nature* | 2025 | DOI: [10.1007/978-981-95-0063-5_34](https://doi.org/10.1007/978-981-95-0063-5_34)

CERTIFICATIONS

Machine Learning Workshop – IIT Kanpur (2024)

Virtual AI-ML internship - Google (2025)

Introduction to Data Science – Cisco (2024)

Discovering SAP Digital Manufacturing – SAP (2024)
